PREFACE

Research results, in this occasion, relating to Biodiversity, need to be disseminated widely in such away that we will get benefit of the innovations achieved. Sustainable production of food, feed, and herbals generated from nutrient rich soils in the forms of plants and animal products are constantly supposed to be concerned. Technologies and economical calculations on improving productivity of food and health stuffs are thrived globally.

International Seminar and Expo on Promoting Local Resources for Food and Health has been conducted on 12-13 October, 2015 hosted by Faculty of Agriculture, University of Bengkulu, Indonesia. There were two keynote speakers from Kemristek-Dikti and Kementan-Directorate General of Livestock Services and Animal Health (Director of Animal Product and Marketing). Three speakers were invited from three countries, Cambodia (Dr. Pao Srean – University of Battambang), Malaysia (Prof. Dr. Datok H. Ibrahim bin Che Omar), and Thailand (Prof. Poonsuha Insung – Rajamanggala University of Technology Srivijaya); four other invited speakers from Indonesia were Kemenkes-Director of Balai Besar Pengembangan dan Penelitian Tanaman Obat dan Obat Tradisional, Bupati Kabupaten Kaur, Bengkulu, Prof. Dr. Rindit Pambayun – University of Sriwijaya, Dr. Ir. Rustama Saefudin, M.Sc – University of Bengkulu. There were around 90 articles of researchers from Indonesia and other countries, Nepal, Pakistan, and Sudan were presented in oral or poster in this occasion.

Topics of articles in this Proceeding were grouped into Food (Local Food, Horticulture, Rice, and Root Crops); Health (Herbal or Medicinal Plants); Agriculture (Aqua cultures, Biotechnology, Cultivation, GIS, Livestock, and Mechanization); and Social-Economy (IT, Integrated Farming System, Socio-Economic of Local Resources).

Finally, we do hope this compiled information on the Biodiversity research results will be useful for more advanced innovation in Agriculture and prosperity as well as wellness for human beings.

Bengkulu, April, 2016

Speech from Executive Secretary ISEPROLOCAL 2015.......................... 1  
Foreword from Dean of Faculty of Agriculture University of Bengkulu 2  
Remarks from Rector University of Bengkulu........................................ 3

### KEYNOTE SPEAKER
Animal Genetic Resources Utilization And Preservation In Support Of National Food Security  

*Fini Murfiani* ......................................................................................... 7

### INVITED SPEAKERS
Exploring The Potency of Indonesia Biodiversity for Herbal Medicine/Jamu  

*Indah Yuning Prapti* ............................................................................. 17

Pengembangan Pangan Berbasis Sumberdaya Lokal  

*Hermen Malik* ................................................................................... 24

Promoting of The Use of Local Food Resources for Healthy Food: In The Case of Southern of Thailand  

*Poonsub Insung* ................................................................................ 27

Knowledge Transfer Strategy for Social Entrepreneurship based on Local Agro-resources for Food and Health Industries  

*Dato Dr Hj Ibrahim Che Omar* .............................................................. 35

Potency of Aquatic Local Resources in Cambodia  

*Pao SREAN, Koemsan SINH, Sothun PRAK, and Chhom BIN* ...................... 44

Technology Development of Potential Local Resources for Food and Health  

*Dr. Rindit Pambayun* .......................................................................... 48

The Role Of Honeybees In Indonesian Society  

*Rustama Saepudin* ............................................................................... 60

### PART A. FOOD
Inventory and Characterization of Sweet Potato (*Ipomoea batatas* (Linn. Lam)) at Semangga District Merauke Regency  

*Amelia Agustina Limbongan and Joko Prastiyono* ................................ 71

A Review: Local Resources For Food and Health In Sudan  

*Nayla Mohammed Gomaa Nasr* ............................................................ 76

Quality Evaluation of Baytat Cake for Customer Satisfaction  

*Evanila Silvia, Yessy Rosalina and Okky Zikrullah* .................................. 81

Application of Edible Coating on Rimau Gerga Lebong Orange (RGL Orange) at Room Temperature Storage  

*Yessy Rosalina, Suprapti Widayati, Asima Rohana, and Joko Prihantoro* ....... 87

In Vitro Propagule Production of Superior Mangosteen (*Garcinia mangostana* L.)  

*A. Romeida and Wiryono* .................................................................... 94

Dietary Intervention with Local Arrowroot (*Maranta arundinacea* L.) Cookies Improves Probiotic Bacteria in Toddler  

*Fitri Electrika Dewi Surawan, Eni Harmayani, Y. Marsono, Madarina Julia* ........ 98
Nutritional Value, Shelf Life and Sensory Evaluation of Arrowroot Bread Enriched with Okara (Soy Residue)

Yenni Okfiganti, Kamsiah, and Risda Yulianti ................................................................. 103

Physical Damages of Tropical Fruits: Case Study of Mangos, “Duku” (Lansium parasiticum), Avocado and Banana Fruits

Yuwana and Evanila Silvia ........................................................................................................ 106

PART B. HEALTH

Curmiyeast as Supplement in PUFA- Concentrate for Modifying Production and Quality of Dairy Cow Milk in Bengkulu

Endang Sulistyowati, Irma Badarina, Sigit Mujihargo, Arif Rusman, Bangun D. Cahyono, and Sistanto ................................................................. 115

The Effect of Fermented Sauropus androgynus Leaves on Performance, Fat Deposition and Carcass Quality in Broiler Chicken

Urup Santoso, Y. Fenita and Kususiyah .................................................................................. 119

Effect of Bay Leaves Boiled Water on Reducing Blood Pressure in Hypertension Patients at Sidorejo Public Health Center (PHC) in Lubuklinggau

Ida Samidah and Murwati ....................................................................................................... 123

Ethnobotanical Study of Medicinal Plants by People of Mukomuko Ethnic in Bengkulu

Kasrina, Sri Irawati, and Desmaniar ....................................................................................... 127

Herbal Medicine and Economic Propective Development in Nepal: A Review

Sanju Kumar Singh ................................................................................................................. 133

Growth and Total Content of Phyllanthin and Hypophyllantin in Green Meniran (Phyllanthus niruri L.) and Red Meniran (Phyllanthus urinaria L.) in Various Ways of Fertilization

Eva Oktavidiati, M. Ahmad Chozii, Nurheni Wijayantii, Munif Ghulamah, Latifah K. Darusman Sunaryadii .................................................................................. 137

Profiles of Pre-Weaning Kacang Goat’s Gonadal Hormones Supplemented with Sauropus androgynus L. Merr

Heri Dwi Pratanto, Yossie Yumianti, Ahmad Zaenii, and Novitri Kurnianti ................................ 141

Fingerprint Study of Phyllanthus Niruri L. By High Performance Thin Layer Chromatography (HPTLC)

Lince Yarni, Sri Murhandini and Tepy Usia ............................................................................ 146

Role of Nurses and other Health Care Providers in Promotion of Health In Pakistan

Madiha Mukhtar ...................................................................................................................... 149

Blood Profile of Layers in Response to Sauropus androgynus Leaves Extract Supplementation in Fermented Palm Oil Sludge Based Diet

Bieng Brata, Yosi Fenita, Nurmeiliasari, and Teguh Yogaswara ............................................. 153

PART C. AGRICULTURE

Yield Trial Of 5 Single Cross Hybrids From Gamma Ray Radiation Inbred Lines Of Maize

Rustikawati, Catur Herison, Edhi Turmudi, Atra Romeida, Supanjani and Ayu Komalsari ...................................................................................................................... 161

Effective Methods for Dormancy Breaking of 15 New-Improved Rice Varieties to Enhance the Validity of Germination Test

Aida F. V. Yuningsih and Sri Wahyuni ................................................................................... 166

Culture Management for Rice Containing Super High Levels Fe with Biofortification Method

M Zulman Harja Utama, Sunadi, Widodo Haryoko and Alrisman Agoes ................................ 174

Development Of New Type Upland Rice Lines For Resistance To Blast Disease Through Anther Culture

Reny Herawati, Bambang S. Purwoko, Iswari S. Dewi .................................................................. 179

The Growth and Yield of Five High-Yield Rice Varieties Following Integrated
